### AMENDMENTS TO CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

#### Listing of Claims

1-89. (canceled)

90. (currently amended) In a computer system, a method for obtaining and displaying information relating to the existence of at least one object in an image comprising:  
obtaining image data comprising at least one object;  
presenting a client interface configured for a providing user to provide identifying information;  
obtaining said identifying information from said providing user wherein said identifying information comprises information that uniquely identifies said at least one object in said image data and wherein said identifying information further comprises location information that identifies coordinates of said at least one object;  
storing said identifying information in at least one first computer;  
presenting a search interface to a searching user;  
receiving a request for at least one image within said image data from said searching user, where said at least one image comprises at least one result object;  
performing a query that returns at least one result object found in said image data; and  
obtaining data associated with said at least one result object from said at least one first computer in response to said request, said data represents said identifying information provided by said providing user for said at least one result object; and,  
presenting said data associated with said at least one result object to said searching user that initiated said request and presenting said identifying information at said coordinates of said at least one object.

98. (currently amended) In a computer system, a method for obtaining and displaying  
information relating to the existence of at least one object in an image comprising:  
obtaining image data comprising at least one person;  
presenting a client interface configured for a providing user to provide identifying information  
associated with said image data;  
obtaining said identifying information from said providing user wherein said identifying  
information comprises information that uniquely identifies said at least one person in said  
image data and wherein said identifying information comprises location information that  
identifies the coordinates of said at least one person in said image data;  
storing said identifying information in at least one first computer wherein said identifying  
information uniquely identifies a single person with within said at least one person;  
presenting a search interface to a searching user;  
receiving a request for at least one search person within said at least one person from said  
searching user;  
performing a query that returns at least one result image data comprising said at least one search  
person wherein said at least one result image data comprises image data found in at least  
one album;

Reply to Office Action of 07/18/2006

means for receiving via said search interface a request from said searching user for at least one object within said image data;

means for performing a query that returns at least one result image data wherein said at least one result image data comprises image data found in at least one album and having said at least one object;

means for obtaining said at least one result image data from said at least one first computer in response to said request;

means for obtaining corresponding identifying information associated with said at least one search object in said at least one result image data; and,

means for presenting via a graphical user interface said at least one result image data and said corresponding identifying information to said searching user that initiated said request and means for presenting said identifying information at said coordinates of said at least one object; and

means for associating a hyperlink with said at least one result image data to initiate a request for other image data.

104. (canceled)

105. (canceled)

106. (new) The method of claim 90 wherein said at least one result object has an associated hyperlink adapted to initiate a request for other image data comprising said at least one result object.

107. (new) The method of claim 98 wherein said at least one result image data presented to said searching user has an associated hyperlink adapted for initiating a request for other image data.
